

Kirami Cult heaters

Cult-si

The CULT heater is Kirami's most popular external 22 kW stove heater for hot tubs. The heater is suitable for heating small tubs.

All Kirami hot tub heaters are manufactured in our own production facility out of high-quality AlMg3 marine aluminium, which boasts excellent thermal conductivity. Each and every one of our hot tub heaters is pressure tested before going on sale. 120mm chimney is suitable for this heater.

The hot tub is heated with an external grey-coloured Cult heater, suitable for heating small tubs. It is made out of high-quality marine-grade aluminium.
