

Kirami Premium Steady Flow

Water jets flow system 3kw Thermowood, Casual Gray

A new addition to the premium product category is the Steady Flow hot tub. Steady Flow is equipped with an efficient filtration system and electric heating. On one wall of the hot tub, at the seat, there are four adjustable Water Jets water therapy jets. The water jets gently caress your back muscles and skin, making you feel heavenly relaxed. Steady Flow is fully insulated to make it as energy-efficient as possible.

In this hot tub, as in all Kirami hot tubs, you can enjoy the closeness to nature without colour changing lights and disturbing loud noises. This allows the surrounding nature itself to be in the centre of attention and a peaceful sense of enjoyment to take over the bather's mind. Could life be any more wonderful?

The Steady Flow hot tub has a moulded-in booster seat to make it easier to get in. The corners of the bench can be used as a backrest and for two people the bench also serves as an armrest. The smooth and light plastic surfaces of the Steady Flow basin allow the optional installation of Kirami's safe LED lights. Factory-installed LED lights create a magical atmosphere for bathing on dusky evenings.

Kirami Premium Steady Flow

Water jets flow system 3kw Thermowood, Casual Gray

The Water Jets flow system (water therapy jets) consists of an electric heater, a filtration system and four water therapy jets. Heater system with 3 kW electric resistance. The heater operates while the filter is on, with a flow switch on the resistor. The estimated heating time is approximately 1°C/hour. A protective hood for the system is included as standard. The gross power of the Water Jets flow system is 3 kw and the net power output transferred to the water is 3 kw. The heat-treated pine used in the outer shell is a Finnish alternative for dark-coloured imported wood. ThermoWood is a high-quality, long-lasting material with a warm brown colour that maintains its shape well. As inside colour, translucent casual grey is frank and carefree. The grey interior is always timeless and elegant, and it blends in beautifully with the environment. The barrel diameter is 170 cm and water volume 1420 litres. It is suitable for 4-6 people. The dry weight of the hot tub is 128 kg. The gross heat output of the WaterJetsFlowSystem3kw stove is 3 kW and the net heat output transferred to the water is 3 kW.
