

Kirami Kirami FinVision® -sauna Original (Roof installed)

Without stove Softwood Rustic Gray, Deep Gray softwood

Kirami FinVision® -sauna shows the high-class finish of a master craftsman. The sauna is already surface-treated; it is made out of plain sawn softwood and spruce plywood. The interior of the cosy sauna invites you to relax. Thanks to the large glass elements, you can always enjoy the feeling of being close to nature. We are sure that even those who are not used to the sauna at all will become sauna enthusiasts once they get into the sauna mood. We believe that the sauna will become one of the most popular places in your garden.

The original -sauna is the perfect solution for those who appreciate tradition. We reconstructed the roof of the Original -sauna in the spring of 2022, thanks to which the sauna will be delivered completely assembled. The roof is also complete. Kirami FinVision® -saunas are always insulated, which helps to ensure that the sauna heats up quickly and keeps the heat in. This makes the sauna suitable also for colder areas.

The sauna is roomy yet compact. The surface area of the sauna is 5.2m² and the building is roughly 2.55 metres tall. The sauna has been designed for 4–6 people, which makes it perfect for both small and large groups.

The light grey sauna benches and the dark interior walls create a beautiful contrast. The benches are easy to lift up for cleaning and maintenance. The LED lights underneath the benches create a cosy atmosphere. The large window gives the sauna a more spacious feel. The window is made of smoky grey tempered glass, which increases the sauna's energy efficiency. Argon gas is placed between the panes for better insulation.

We recommend to check the handedness of the doors of the sauna under the "Instructions for use" tab. By default, the sauna door is always right-handed (figure A). The mirror image options for the sauna doors are shown (figure B). Also pay attention to the handedness, if you order a changing room when ordering a sauna, the options can be found in the same user manual and more information under the changing room product or [on the product brochure pages](#).

The grey glass door is equipped with a magnetic lock that ensures smooth opening and closing and secures the door. The round door handle is made of thuja and bears the Kirami logo.

Kirami Kirami FinVision® -sauna Original (Roof installed)

Without stove Softwood Rustic Gray, Deep Gray softwood

As a standard the door is on the right side of the sauna and it opens up right-handed. The exterior of the sauna is made of Finnish rustic grey softwood. The staggered, plain sawn exterior boards give the sauna a lively look. The interior walls of the sauna are made of deep grey Finnish softwood. The sauna's warm and dim atmosphere helps you relax both physically and mentally. This sauna, delivered without a heater, has pre-installed lights underneath the benches, connected to a junction box and a plug outside. The lights can be turned on by plugging them in. A separate light switch should not be installed in a sauna. If a customer prefers to buy a heater from another supplier, the lights can be installed, depending on the model, to be operated with the heater's control. However, we recommend checking with the heater's manufacturer whether this is possible. The customer must also arrange for the heater to be installed and wired in. The floor grille does not have a pre-cut hole for the heater, and instead one is made on location, based on the heater's size and safety distance requirements.

Technical information

CAPACITY (PERSONS)	4-6
