**HARVIA**

# *Kirami FinVision® -sauna M Tile*

## *Save electricity with a low-energy sauna*

The Kirami FinVision® -sauna M Tile is a ready-to-use outdoor sauna designed for 4–6 people. It is built to be as energy-efficient as possible without compromising the authentic Finnish sauna experience.

- A pre-assembled sauna with plug-and-play electrical connections that only needs to be placed on a solid foundation.
- The sauna combines Finnish traditions with European design.

### **EXCEPTIONAL ENERGY EFFICIENCY**

Our low-energy sauna takes energy efficiency to a whole new level.

- Fully insulated structure
- Triple-glazed thermal windows
- Heats up with a Harvia Delta 3.6 kW heater\*
- Significantly low electricity consumption

\* Typically, an outdoor sauna of this size requires an 8–10 kW heater.

*Traditional Finnish sauna experience  
- with modern style and innovative technology*

*Well-being for you and the environment*

## *Kirami FinVision® -sauna M Tile*

*The first fully self-sufficient  
off-the-grid electric sauna*

The energy-efficient Kirami FinVision® -sauna M Tile, equipped with pre-installed solar panels and a battery, allows you to enjoy sauna sessions without connecting to the power grid. ***Enjoy the heat wherever you are.***

- A complete package including solar panels and batteries for energy collection.
- With full batteries you can use the sauna for appr. 4-5 hours.
- Bluetooth connection & free app to monitor the system values.
- Installed by certified professionals.

## ALSO AVAILABLE IN S SIZE

Both sauna packages are also available in a smaller version, the Kirami FinVision® -sauna S Tile, designed for 3-5 people.

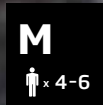

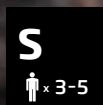

In the smaller sauna, the benches are placed on one wall, and it is heated by a Harvia Delta 2.3 kW heater. The solar-powered version includes two panels, and the batteries are under the benches.
