

Kirami FinVision® Annex creates a backyard paradise

Kirami FinVision® Annex – build your own backyard paradise

Sauna encompasses more than just relaxing in the soothing warmth, chilling out, bonding with others, and relishing the ambiance. **Kirami FinVision® Annex** is a transformative concept that elevates sauna bathing into a holistic experience, integrating all elements of enjoyment and crafting an authentic backyard paradise. Kirami FinVision® Annex also presents numerous business possibilities, such as offering rental packages or enhancing the amenities of holiday destinations.

In addition to high-quality **Kirami FinVision® saunas**, the Annex concept includes elegant changing rooms, adaptable terraces for diverse purposes, inviting lounges, and, as the newest inclusion, hot tubs that seamlessly align with the visual aesthetics of the entire Annex series. They can also be complemented with with outdoor decorations and grills from the **Outstanding** series. With the Kirami FinVision® Annex modules, you can build your own personalized backyard paradise – with or without a sauna. Modularity allows you to choose the elements that best suit your available space and preferences.

The Kirami FinVision[®] Annex modules, hot tubs, and other products have also been designed to be uniform in appearance. You can bring your own unique vision to life, ensuring seamless harmony between all elements. We have simplified the process for our customers to buy and begin using the modules, making the Annex concept exceptionally user-friendly and effortless.

This catalogue invites you to explore the entire world of Kirami FinVision[®] Annex. Since our previous edition, we've added a new window to all Misty sauna models. In addition to the stunning panoramic window, there's now a window behind the heater as well – bringing you even closer to nature while you relax. Our range of sauna heaters has also expanded.

We hope you find the catalogue inspiring!

How sauna works and why is it good for you!

Kirami Oy is a family-owned company established in 2001 that became part of the **Harvia Group** on 28 May 2021. Kirami is the largest hot tub manufacturer in the world, known for its high-quality hot tubs and pools. In addition to the hot tubs, the **Kirami FinVision**[®] **sauna** has become wildly popular. Modules compatible with the sauna, such as a changing room, lounge or terrace, form the **Kirami FinVision**[®] **Annex** concept and provide you with an even more enjoyable sauna experience. The **Outstanding by Kirami** product family includes grills, outdoor fireplaces and garden decorations. **www.kirami.com**

At the heart of Finnish sauna tradition

2 mg

While washing has always been integral to the sauna experience, saunas offer much more than just the benefits of cleanliness. People use saunas to unwind, socialize with friends or simply bask in the comforting warmth.

Up on a bench, you can wind down, and forget work and other mundane things. You can bathe with friends, but many also enjoy spending time alone with their thoughts. In the dim light of the sauna, people often contemplate the purpose of life and, occasionally, find clarity too.

Cooling down is another important part of the bathing. You can take a shower, dip into a hot tub, plunge yourself into a lake or the sea, or spend a moment on a patio. After enjoying the heat, wash yourself and continue to take things slowly, perhaps having a bite to eat and a drink, and finally returning to normal life, feeling refreshed, relaxed and at peace.

Traditional sauna bathing is just one of the ways to enjoy Kirami's products. If you are seeking a more comprehensive spa experience, Kirami can help you.

ALL STREEMENT DES

Health benefits

Sauna is beneficial both to your physical and mental well-being. It relaxes your muscles, accelerates your heart rate and dilates your peripheral blood vessels. The latter lowers your blood pressure and does wonders to your heart.¹ Bathing in a sauna is like exercising.² It is also good for your mucous membranes, and the humid air of the sauna may even reduce symptoms of asthma.

Studies have shown that sauna bathing may also affect the quality of sleep. The results suggest that sauna bathing, in part, helps us relax, achieve higher quality and more restful sleep, and increases the amount of deep sleep.^{3, 4} According to research, just two sauna sessions per week will also reduce the risk of developing dementia.⁵

¹ Laukkanen, Kunutsor, Zaccardi, Lee, Willeit, Khan, Laukkanen: Acute effects of sauna bathing on cardiovascular function. Journal of Human Hypertension 2017.

² Vienna E Brunt, Matthew J Howard, Michael A Francisco, Brett R Ely, Christopher T Minson: Passive heat therapy improves endothelial function, arterial stiffness and blood pressure in sedentary humans.

³Nyyssölä, Valtteri (2020). Effects of sauna-bathing on sleep quality, recovery and stress. JAMK University of Applied Sciences.

⁴Hussain, J. N., Greaves, R. F., & Cohen, M. M: A hot topic for health: Results of the Global Sauna Survey. Complementary therapies in medicine 2019.

⁵ Tanjaniina Laukkanen, Setor Kunutsor, Jussi Kauhanen, Jari Antero Laukkanen: Sauna bathing is inversely associated with dementia and Alzheimer's disease in middle-aged Finnish men.

For more information about the Finnish sauna, sauna traditions and health benefits, please visit the Sauna from Finland website. Their mission is to build the best, most holistic sauna experiences in the world and market them globally. Kirami is a member of the Sauna from Finland business network.

The Kirami FinVision[®] -sauna S Misty combines compact design with full features, making it an ideal choice for smaller outdoor spaces.

The external surface of the sauna is heat-treated spruce panelling, which has been pre-treated. The carefully finished interior surfaces are heat-treated hardwood. The sauna atmosphere is complemented by the cosy LED lighting on the benches.

Large glass surfaces add a sense of space and make the compact sauna feel bigger. The view through the window brings bathers closer to nature. The double-glazed window made from grey, tempered glass is also energy-efficient, and the argon gas between the glass panes enhances insulation.

Available as a mirror image.

The surface-treated Kirami FinVision[®] -sauna M Misty is made from black spruce panels and heat-treated hardwood. The clear-cut and simple style suits a variety of backyards.

The finishing touches on the benches and other interior surfaces make them stunningly beautiful. The dark colour and scent of the hardwood create a pleasant and inviting atmosphere. In addition, the LED lighting on the benches adds to the cosiness. All the electrical connections in the sauna operate conveniently on a plug-and-play basis.

The large glass surfaces bring nature close to the bathers. The double-glazed window made from grey, tempered glass enhances the sauna's energy efficiency, and the argon gas between the glass panes improves the insulation.

Kirami FinVision® -sauna S/M Misty with infrared heaters

Increasingly versatile sauna experiences with infrared heaters

Kirami FinVision[®] -sauna M Misty can be equipped with four infrared heaters, available as additional accessories. They heat the body from within and provide a unique sauna bathing experience.

The infrared heaters are placed underneath a continuous surface across the entire back wall of the sauna, behind panelling made with a specially designed profile. Therefore, the LED lighting has been moved from the back rest to the rear edge of the top bench. However, a second light strip is located on the front edge of the lower bench, as usual.

Infrared heaters must be ordered simultaneously with the sauna since they cannot be installed at a later time.

Infrared heaters are also available for S-sized saunas. Consult your retailer for more information.

Heater options

We have carefully selected Harvia heaters that not only offer excellent performance and heating power, but also complement the style and atmosphere of our saunas.

The wood-burning heater range now includes the space-saving yet efficient M3.

Let your imagination in backyard design fly – Kirami FinVision® Annex

With the Kirami FinVision[®] Annex modules, you can build your own backyard paradise – with or without a sauna. Modularity allows you to choose the elements that best suit your available space and preferences.

Kirami FinVision® ANN EXER elen The cont env

The modules include a sauna, a hot tub, a changing room, a bench, a lounge, a pergola and terraces. You can connect them to each other in any order or use them as separate elements. All combinations are equally correct. You decide!

The most remarkable aspect of the Kirami FinVision® Annex concept is that it imposes no limits on your creativity while envisioning and planning your perfect backyard oasis. Moreover, there is no necessity to buy everything at once; you can begin with a single module and progressively add new ones as your vision and requirements evolve.

Complete sauna experience Complete sauna exp

Combining module

Nothing will hinder your creativity when planning a backyard paradise.

The Kirami FinVision[®] Annex modules have been designed to have a consistent appearance, and new units will fit in with existing ones both structurally and aesthetically. The black spruce panels used in the exterior cladding seamlessly integrate different modules into an elegant whole.

Acquiring the modules is easy, and the installation is straightforward. The modules are lifted side by side to the desired location and fastened to each other. All you need is a flat surface in the backyard. Clear and detailed instructions are included, and more information is available on Kirami's website.

In addition to the Kirami FinVision[®] Annex modules, Kirami also has a wide range of hot tubs, accessories and equipment available to guarantee enjoyment. Complementing your backyard oasis with the Outstanding product family's grills, fire pits and garden decorations will bring you very close to perfection.

Easy design with Kirami FinVision® Annex

Whether creating your own backyard paradise or an oasis for business use with rental units, start by carefully considering which elements to include. Is your vision centred around a sauna, do you want a cosy spa area or would you prefer to have an idyllic outdoor kitchen and dining area? Additionally, you may want to add an Annex hot tub, or an Outstanding grill, fire pit and outdoor decorations.

The next step is to decide where to place the modules. Take note of the available space and find the most suitable spot for each module.

Once you have decided which elements to include and where to place them, you can combine Kirami FinVision® Annex modules and accessories based on your own unique vision. It is easy because the modules have been designed to perfectly match each other in appearance.

These two pages contain a few examples of module combinations of various sizes. However, they are only suggestions. You can freely choose your preferred combination! If you need assistance with the planning or more detailed information, please contact our retailers.

Kirami FinVision® -changing room S Misty

Bench Accessory

q

Kirami FinVision[®] -changing room S for a Misty sauna is a fullyassembled module with all the walls in place, and it is seamlessly compatible with the sauna. The surface-treated exterior panelling of the changing room is made of heat-treated spruce panels, and the interior is heat-treated hardwood, similarly to the sauna. The changing room has a smoke-grey glass door with a wooden frame that sets the perfect mood and adds a sense of space. The door is the same size as the one in the hot room, and all the glass surfaces share the same colour tone. Changing rooms are available with either one or two doors.

A bench, clothes hanger and LED lights are available as accessories for the changing room. The light switch can turn on the lights in the clothes hanger and the spotlights on the dressing room ceiling. A changing room can be ordered either together with a sauna or as an addition later.

Availabi

Kirami FinVision[®] -lounge M Misty is an independent module that can either be seamlessly attached to the other Kirami FinVision[®] Misty modules or used as a separate building. The lounge is suitable for cooling down or being used as a remote workspace, and it can be decorated with a Kirami FinVision[®] sofa set, rug or other furniture.

The easy-care external surface of Lounge M is made of sustainable, heat-treated softwood panels, while the interior is heat-treated hardwood*. The floor, walls and ceiling are insulated, making the space pleasant to use all year round. The large window made from tempered glass brings in plenty of light and matches the colour tone of the other modules. Lounges are available with either one or two doors.

Lounge XL can also be built as a mirrol

Sofa set, grey Accessory

> Read more on the product page:

Kirami FinVision[®] -lounge XL Misty consists of two pre-fabricated Lounge M modules that are attached to each other at the installation location to form a single space. Lounge XL can be connected to the other Kirami FinVision[®] Misty modules or used as a completely separate building.

Lounge XL is suitable for many uses: as a guest house, a bedroom, a place to cool down, a hobby room and even a remote workspace. A lounge can be decorated with a Kirami FinVision[®] sofa set, rug or other furniture. Lounge XL comes with pre-installed lighting and sockets. The light strip on the back wall creates a soft ambient light, while the four LED spotlights on the ceiling illuminate the entire room more brightly.

The external surface of lounge XL is made from softwood panels*, while the interior is hardwood*. Thanks to being insulated, the space can be used year round. The windows made from tempered glass match the colour tone of the other modules. Lounges are available with either one or two doors.

Kirami FinVision® -terrace S/M Misty

Photographer: doop: Mikko Kovasiipi

Kirami

Kirami FinVision® -terrace Misty is available as S and M-sized modules, which are easy to attach to the other Misty buildings. S and M-sized terrace modules can also be attached to each other. A terrace can be installed e.g. between or as an extension to a sauna, a changing room or a lounge, so that it forms a pleasant area for cooling down under a roof. You can also install a small outdoor shower corner on the terrace for summer use. One option is to get a terrace as a sheltered stand-alone sun deck or outdoor kitchen. The only limits are imagination and the size of the backyard!

A terrace module consists of a back wall, roof, floor and support posts on either side of the front sections. The external surface of the back wall is spruce panelling, while the interior wall surface and ceiling are made from heat-treated 3D slatted panels, giving the terrace a lighter appearance.

STATISTICS.

Kirami

Kirami FinVision[®] -pergola M Misty is a fully assembled module that is easy to attach to the other Misty buildings. It can be installed between, in front of or as an extension to a sauna, a changing room, a lounge or a terrace, allowing it to serve as a convenient place to cool down. Alternatively, a pergola can be used as a stand-alone module, like a sun deck.

The smaller Kirami FinVision[®] -pergola S Misty is also suitable as an area for cooling down, or it can be used as a separate module that provides a sheltered resting place with ample space for a sun lounger. You can create a relaxing green oasis by decorating your pergola with climbing plants and hanging lights. The S-sized pergola can also be connected to one or more M-sized pergolas. An M-sized pergola can be used as a corner module, allowing the entire structure to be installed in an L or U-shape.

Please also see our privacy screens, sold as accessories.

Kirami FinVision® -patio S/M Misty

Photographer: doop: Mikko Kovasiipi Kirami

The pre-assembled Kirami FinVision[®] -patio Misty modules allow you to expand your existing terrace space easily and efficiently. You can place e.g. a hot tub, a sofa or a BBQ on the patio.

The pre-assembled element can be installed in front of or behind other Misty modules, or used as a stand-alone unit. The patio module sizes are the same as those of the other Kirami FinVision® Misty modules, i.e. an M-sized patio module is compatible with the M-sized modules and an S-sized one with the S-sized modules. Two M-sized patios are required in front of an XL-sized lounge module.

The decking boards of the patio modules are made from heattreated pine*, the patio frame is spruce* and the bottom transport supports are larch, which can withstand humidity better.

Pictured size M, but also available in size S

Kirami FinVision® -outdoor shower Misty

KIRAMI FINVISION® -OUTDOOR SHOWER MISTY Kirami FinVision® -outdoor shower Misty is refreshing and helps keep the sauna, hot tub and cool-down area clean. There is an outdoor shower model suitable for the terrace modules and one that can be installed outside a terrace.

Kirami FinVision® -outdoor shower Misty is a pre-assembled module made from heat-treated pine and stainless steel, consisting of a wall, floor and shower, as well as convenient shelves located between the inner and outer wall.

When a shower suitable for Kirami FinVision[®] -terrace (S/M) is ordered together with the terrace, the outdoor shower module comes pre-installed on the terrace. A shower wall can also be installed afterwards, in which case it is delivered in two parts.

KIRAMI FINVISION® -OUTDOOR SHOWER TOWER MISTY The lighter shower tower in the Kirami FinVision® Misty series can be installed on any flat surface, and the module either comes with or without a metal base.

Kirami FinVision® Annex hot tubs

The world famous Kirami hot tubs include three models specifically designed for the Annex concept. The outer shells of the hot tubs are made from the same material as the Kirami FinVision[®] Annex modules.

Annex Tiny S

Compact and easy to maintain, the Annex Tiny S hot tub is suitable for one or two bathers. Light in weight and compact in size, the tub is easy to install in a small backyard or on a patio. Thanks to its small water volume, Tiny is quick to heat up, allowing you to enjoy a spot of luxury even on busy weekday evenings. Safe preinstalled LED lighting is available for the tub to bring out its own colour and create a magical atmosphere for spa sessions later in the season when the nights begin to draw in.

The heater options include the electric DUAL HEATPUMP and the grey-coloured external wood-burning CULT heater. CULT is made of high-quality, highly heat-conductive marine-grade aluminium.

The surface material of Annex Tiny S is recyclable and easy to care for heat-treated softwood panel. The material is the same that is used on the outer surfaces of all Annex modules, making the hot tub perfectly compatible with them. Thermal treatment improves the wood's resistance to decay, reduces swelling due to moisture and makes the wood long-lasting. The timeless and trendy grey colour of the tub is elegant and blends well with many types of backyards.

Annex Family M and L

The Family hot tubs have been developed to take the needs of the whole family into account, regardless of age and physical condition. The tubs' seamlessly integrated seats can be used for cooling down, and children can rest on the higher seating level. The design also makes it easier to enter and exit the hot tub.

The outer shell of the hot tub is made of deep black surface-treated softwood panel. Thermal treatment enhances the wood's resistance to decay and moisture-induced swelling, while the colour protects it against dirt and UV radiation. Stylish thermally treated wood ensures durability and recyclability.

The Family M model is heated by a high-quality, highly heat-conductive black CUBE heater made from marine-grade aluminium. Timeless in colour and design, CUBE can heat up even the largest of hot tubs quickly and efficiently. Similarly, the Family L model is also heated by a highly efficient, bronze-coloured round TUBE, made from high-quality marine-grade aluminium.

Kirami FinVision® accessories

Kirami FinVision[®] -changing room clothes hanger Misty

A clothes hanger tailored for the Kirami FinVision[®] -changing room is available as an accessory; it is installed on the back wall. It comes either with or without LED lights.

The clothes hanger is made from heat-treated hardwood and has five hooks for hanging up towels, bathrobes or clothes neatly. Small objects can be placed on top of the hanger for safekeeping during sauna bathing. Clothes hangers ordered at the same time as the changing room are installed at the factory.

- Installation height: The height of the top edge of the clothes hanger is 1,800 mm from the floor.
- Length: 1,270 mm
- Width: 110 mm
- Height: 148 mm

Kirami FinVision® -neck rest Misty

Blending beautifully into the other materials in your sauna, the rounded neck rest adds more comfort to bathing. The easy-to-attach Kirami FinVision[®] -neck rest cushions, available as accessories, make relaxation even more enjoyable.

Kirami FinVision® -changing room bench Misty

A bench tailored for the Kirami FinVision[®] -changing room is available as an accessory; the bench is installed on the back wall.

The bench is made from heat-treated hardwood, and shares the same style and shape as the sauna benches. The bench is delivered pre-installed on the back wall.

- Installation height: 450 mm
- Length: 1,270 mm
- Width: 500 mm

Kirami FinVision[®] -infrared heaters Misty

Four infrared heaters can be installed on the back wall of Kirami FinVision[®]-sauna M Misty. These accessories must be ordered together with the sauna, because heaters cannot be installed afterwards.

The infrared heaters are placed on the back wall, underneath a continuous surface, which means that the profile of the back wall panel is different and the sauna does not have a separate back rest. Therefore, the LED lighting has been moved from the back rest to the rear edge of the top bench. The other light strip is located on the front edge of the bottom bench in both options. There is a 20 mm safety gap between the heater and the slats, allowing bathers to lean against the panel safely.

The sauna has its own control panel for the Virta Combi steamer and a separate controller for the infrared heaters.

Infrared heaters can also be purchased as accessories to Kirami FinVision[®] -sauna S Misty.

Kirami FinVision[®] -sofa set Misty

What would Kirami FinVision[®] -lounge be without a matching sofa set?

The set includes a sofa and a footstool with covers, as well as a tray that fits the dimensions of the footstool. The frames are heat-treated solid wood, surface-treated with paraffin oil. All three pieces of the set are delivered pre-assembled and ready for use.

Set the vibe with colours! Choose a bold orange or a subtle grey as the colour for the sofa and footstool. The sunny orange radiates joy and heat all year round, while the timeless grey suits all interior styles.

The waterproof, UV and mould-protected fabric of the sofa is also suitable for outdoor use. The dirt-repellent Teflon treatment provides excellent protection when bathers sit down to dry themselves. The sofa seat cushion can serve as a sleeping surface, and the four large, soft back cushions practically invite you to lean back and relax.

And to make the relaxation complete, you can put your feet up on a footstool. Alternatively, you can use the footstool as a table, together with a tray that comes with it. The sturdy tray and the snacks on it will not fall off the footstool, but the tray can be detached if necessary. The soft parts of the stool are upholstered with the same fabric as the sofa, and the tray is made of heat-treated solid wood, just like the frames of the sofa and the footstool.

All the parts of the set can be bought either together or separately. Their styles match each other seamlessly and make the Kirami FinVision[®] -lounge feel even cosier.

Kirami FinVision[®] -cushion Misty for sofa and bench module

Kirami FinVision[®] cushions for the sofa and bench module are designed for sofas placed in a Kirami FinVision[®] lounge and for bench modules installed outdoors. Cushions for the bench module are always sold as an accessory. However, they are included in the sofa set.

If desired, you can order a set of replacement cushions. With cushions in different colours, you can change the decor e.g. according to season or mood. The colour options include warm orange and harmonic grey. The cushion fabric is waterproof, UV-protected, mould-protected and Teflon-treated.

Kirami FinVision[®] -sofa backrest Misty

Kirami FinVision[®] -sofa backrest Misty is an accessory to the sofa designed for the Misty modules. The sofa works perfectly without a backrest when the sofa cushions are supported by the wall behind, for example in a lounge setting. If there is no wall to provide support, a separate backrest is needed.

A clear-lined, detachable backrest, available as an accessory, is easy to attach to the Misty sofa. The backrest is screwed onto the sofa legs using the supplied furniture screws as instructed. A sofa equipped with a backrest can be placed indoors or outdoors, depending on your preference or decor, for example on a terrace.

The backrest is made from the same solid wood as the sofa frame. The backrest and the sofa itself can be treated with paraffin oil at regular intervals.

Kirami FinVision[®] -garden screen S/M

If you desire your own tranquil cooling, dining or reading corner for your backyard, ready-made privacy screens for pergolas are available as accessories for the Kirami FinVision[®] Misty series. With garden screens, you can enhance privacy and restrict access. You can also enliven the pergola in your preferred way. The slats of the garden screen let light through beautifully, and plants or vines can be trained to grow on them. Adorn your pergola ceiling or slats with an atmospheric light strip, and you will discover yourself gravitating towards your cosy and inviting backyard corner, whether alone or with friends.

The elegantly black garden screens made of spruce slats* go well with other Misty products. Choose an M-sized screen for M-sized modules and an S-sized one for S-sized modules.

Sauna & Spa

HARVIA

Sauna speaker

The Harvia Bluetooth speaker provides a water and heat-resistant solution for enjoying music in the sauna and other humid environments. The speakers are available in red or black and allow you to wirelessly listen to music from your phone, tablet, laptop or other Bluetooth-compatible device. The speakers are water-resistant and can withstand heat up to 65 degrees. By acquiring two speakers, you can pair them as a stereo pair and listen to music in stereo.

Ask the seller about other audio devices as well.

Kirami FinVision® Annex -toiletbag M

Kirami FinVision[®] Annex -toiletbag M is a unique collaboration with PURYE.

At Kirami, we wanted to find a meaningful way to repurpose our surplus fabric-something that truly reflects our brand's essence: sauna and bathing. To protect our products from rain and debris during shipping, we use fabric made from recycled PET bottles. However, each roofcover leaves us with leftover 48x48 cm fabric pieces from the corners. Rather than letting this material go to waste, we teamed up with PURYE to give it a new purpose.

Wi-Fi app for electric heaters

Kirami saunas can be equipped with a control panel compatible with Harvia electric heaters, featuring a Wi-Fi application. Inquire with our sales representatives about the compatibility of the Wi-Fi control panel with the Harvia heater of your chosen Kirami FinVision[®] sauna.

Our love for saunas and bathing led us to create our own high-quality product family of top-grade textiles and accessories, and we decided to call it Kirami FinVision[®] Experience. We feel that Kirami FinVision[®] Experience reflects the essence of what Kirami products are about: sensations, pleasure and experiences. Life is here and now, and we must be able to enjoy it.

BATHROBES

Our timelessly elegant bathrobe has a wide hood and handy side pockets. The bathrobes are 100% cotton, durable when used and washed, and they do not cause an itch or irritate the skin. The same design suits both men and women.

Synamiance

TOWELS

Synnia

Our attractive and wonderfully soft towels are made from 100% cotton honeycomb fabric and allow you to dry yourself off gently after enjoying a sauna or a hot tub. A true everyday luxury.

gunina

TUB HATS

A tub hat will keep you warm in the winter and deter insects in the summer. It will also add a bit of humour to your bathing sessions, regardless of the season. In the sauna, a tub hat will protect your hair and scalp from the heat.

WASHBAG

Our washbags are handmade in Finland in collaboration with Purye Clothing using recycled sailcloth and leftover leather. The bag helps you organise all your sauna essentials and have them at hand at all times.

BENCH TOWEL

Our high-quality bench towel feels pleasant against your skin. The size of the towel is 45 x 55 cm, and it is made from 100% cotton. The towel will maintain its shape and colour despite repeated washing.

Barminu

Easy to purchase

- Extensive knowledgeable network of retailers
- Wide range of products
- Final price known at the time of ordering, no hidden costs
- Products made by a professional
- Delivered fully assembled
- Clear, comprehensive instructions
- Answers to all questions on the website
- Product cards

Safe to use

- Lights and electrical connections factory-installed
- Harvia heater of a correct capacity, two heating methods
- Lockable doors
- Toughened glass panes
- Manufacturer's warranty

Easy to start using

- Placement on an even surface (use gravel, if necessary)

TEHTY SUDMESSA ■ MADE IN FINLAND

How we deliver your Kirami FinVision® Annex modules

While the Kirami FinVision[®] Annex modules are delivered as nearly finished buildings, there are a few considerations to address before you can fully relish your backyard paradise.

PREPARATIONS

Ensure that the installation surface is flat and able to withstand the weight of the module. Check the suitability of the ground for construction together with a specialist. Also, decide in advance where you will direct the water from the sauna's drainage pipe. You can level the ground with gravel and concrete tiles, or cast a concrete base. Alternatively, modules can be erected on screw piles.

In a cold climate, the foundation should be insulated by placing 5-10 cm thick frost insulation boards under the gravel.

Screw the screw piles into the ground. Attach horizontal joists to the screw piles. Ask an expert which screw piles are suitable for your ground type.

BEFORE DELIVERY

tiles using a durable material.

bed. Build a frame on top of the concrete

Before the agreed delivery time, it is important to ensure that the route to the site is accessible and the delivery can be taken all the way to the intended location without any interference. When receiving a delivery, the lifting directions should be taken into account, i.e. where you want the windows to face, for example.

Make sure that the concrete base is flat.

Kirami FinVision[®] Annex modules are delivered to the installation site as whole units, almost fully assembled.

All the customer needs to do is remove the module's transport protections and carry out the installation according to the instructions, including attaching the door handle and the baseboards.

The electrical connections are conveniently made using the 'plug and play' principle, i.e. one plug connection per unit. Inside the sauna, the electrical installations have been completed. A licensed electrician must be used to connect the sauna to the power grid.

Kirami FinVision[®] Annex also suitable for business use

The Kirami FinVision® Annex concept offers many opportunities for business use. The Annex concept enhances value and complements the offerings of accommodation and recreation providers, whether presented as an expanded rental combination or as an addition to an individual holiday home, featuring both a sauna and a hot tub. Different Annex modules can be used to build a rental recreation area complete with a sauna, a shower and a hot tub. The lounge modules can serve as accommodation facilities, allowing you to create an entire holiday village, for instance.

Photo: KiramiUK

The most popular uses for the Annex concept include glamping sites, alpine villages, Airbnb accommodations and vineyards. Here too, the many uses of the Annex modules are only limited by the imagination.
