Hot tubs 2021

Kirami provides its customers with high-quality wood-heated tubs and a wide array of different kinds of supplies and accessories. More than 10,000 tubs made by Kirami are sold annually all over Europe, and their popularity is growing constantly. Kirami is the largest hot tub supplier in the world.

The story of Kirami started 20 years ago in 2001. The first hot tubs were imported from Sweden, but the company's own production started soon after. The company moved into larger premises in 2006, and the product range expanded to cover hot tubs made out of ThermoWood. Kirami moved into its current premises of more than 3,000 square metres in early 2011. Hot tubs with a plastic inner tub and a comprehensive range of water treatment chemicals were launched the following year.

The product range expanded yet again in 2015. The high-quality Outstanding product line focused on BBQ grills, outdoor fireplaces and outdoor decoration made out of fashionable, robust COR-TEN steel. New ground was broken again in 2019, when Kirami launched the Kirami FinVision -sauna with a close connection to nature.

Kirami AB was established in Sweden in February 2020, and the number of resellers increased as several new chains joined in.

Kirami's mission is to offer top-quality and easy-to-use products that you can be proud of. All of the tubs and pools are manufactured by hand from carefully selected materials, and they are assembled at Kirami's factory in Sastamala, Finland.

MADE IN +  
FINLAND

# *Kirami – 20 years of delightful bathing experiences*

Kirami celebrates its 20th anniversary this year, and even though such anniversaries probably mean the most for the companies themselves, our 20 years of experience also benefit our customers greatly. During all this time, we have amassed an enormous amount of knowledge of materials as well as skills and expertise so that we can manufacture durable products of high quality that our customers can enjoy for a long time.

The favourite hot tubs of 2020 were the **Steady** and its 'little brother' **Hazy**, which was not yet ready in time for our previous catalogue. Our largest hot tub models **Family L** as well as the **Minipool Grandy** also sparked major interest. We have made changes to the **Chill** hot tub. As a result, it is not just sturdier, but also more streamlined, meaning that it is now easier to take through even the smallest gates and passageways. This means that you can be even more certain of finding a hot tub of the exactly right size with the right features for your own yard in Kirami's range of hot tubs.

Because there are so many models, finding a suitable hot tub may feel challenging, but Kirami has made that, too, simple and even fun. On page 8, you can read more about the **product selector application** as well as the convenient product cards that you can create online and print out as a shopping list.

Of the other new products, we should mention our **BioCool** water treatment products that are now easier to use than ever before and offer a completely chlorine-free option for keeping the bathwater clean.

Our **Kirami FinVision -sauna** is a story of its own. The Kirami FinVision -sauna with an expressive appearance, equipped with a large window and delivered already assembled, has become so massively popular that we opened a separate Sauna Factory for it next to Kirami's factory.

*Enjoy browsing our new product catalogue!*

# Original

Kirami Original brings you to the roots of an authentic bathing experience. The quality of the simple, traditional hot tubs is born out of their carefully selected materials and finish. The Original product family has an option available for groups of bathers of every size. **Breezy** takes easy care further than ever, and the **Woody** tubs appeal to nature lovers who appreciate the atmosphere created by real wood. **Chill** is shallower than the other hot tubs, which makes it easier to transport even to small yards; the resting sitting position gives you a completely new way to relax in the tub. As for **Tiny** and **Woody Tiny**, they offer a pleasant setting for two people to bathe together. The latest addition to our catalogue is **Hazy**, our highestselling hot tub of the summer of 2020.

The Kirami Original hot tubs are purely Finnish.

# Premium

The products in the Premium series are Kirami's flagships. Their design, efficiency and comfort of use are in a class of their own.

The Premium product family includes the luxurious **Pearly**, which is also available with a truly stunning outer surface in genuine copper, and the **Grandy XL**, which is the largest tub in our product range as its name suggests. The **Red Cedar Premium** hot tubs are also a part of the Premium product family.

## Comfort

Kirami Comfort offers enjoyable bathing experiences effortlessly. The easy-care, plastic hot tubs are an excellent choice for active hot tubbers.

The Comfort series' great favourite **Steady** suits people who appreciate easy-care products, comfort and modern style. The **Family** hot tubs have plenty of options for small and large families. They are designed to take the needs of families with children, elderly people and less abled bodied into account by ensuring that getting into and out of the tub is as easy and safe as possible.

# What Kirami is:

## *Easy to buy:*

- A reseller network within reach.
- Wide range of products.
- Can be placed almost anywhere.
- Appearance and placement can be tested with a 3D application.
- Can be delivered anywhere.
- Delivered already assembled; the customer only needs to attach the heater and the chimney.
- Clear, comprehensive instructions.
- The blogs and the FAQ page have answers to any questions you may have.
- The online shop is always open.
- On the website, everything necessary can be collected on a convenient product card, which can be used to help with the purchase.

## *Safe to use:*

- All chimney packages include a heat shield.
- Thanks to the water jacket, the heater never becomes burning hot.
- Lockable covers.
- The water flow-through holes of the tubs are covered with protective grates.
- Lights installed safely at the factory.
- 2 year product warranty.
- Sturdy and safe steps that fit all hot tubs.
- Models that take the needs of families in particular into account.
- Two different types of heaters: wood and electric.
- Fireproof hearth plate and lockable covers.

## *Effortless to equip:*

- Suitable covers, steps and drink holders available for all models.
- Plenty of accessories, such as neck rests and led lights.

## *Easy to care:*

- Easy to empty completely out of water.
- Simple to keep clean.
- The heater is easy to clean.
- An anode rod protects the heater from corrosion and ensures a long service life.
- The EPS base is light and weatherproofed.
- Outer surface options that require no maintenance: EcoPlank, EcoStripe, Metal and Copper.
- The cover protects the tub from rubbish and keeps the bathwater warm.

# A responsible choice:

- Made in Finland.
- Standardised.
- Responsible manufacturer.
- The whole lifespan has been considered: longlasting and recyclable.
- Strong brand.

or Google Play (Kirami).

### 3D hot tub selector

Build the hot tub you want in the application and see how it fits in your own yard.

## Tools to help you with choosing a hot tub

### Product selector

Kirami's product selector makes finding the perfect hot tub for you and your family not only easy, but also fun.

Browse Kirami's range of hot tubs and choose the hot tub and heater with the size and features that suit you best from among several options.

Next you can compare the interior and exterior materials available for the hot tub of your choice. You can try out the different options and combinations and see immediately what your hot tub would look like.

After finding a suitable hot tub and the materials you like best, you can try and see what the hot tub would look like in its natural habi-

tat - your own yard or terrace. On the phone screen, move the image of your chosen hot tub to the place where you intended to put the hot tub and take a picture. Now you have a convenient way of showing your plans to the other members of your family, for example.

Finish your hot tub by adding the accessories you want, such as steps and a drink holder. The system always suggests accessories suitable specifically for the package you have selected, so you cannot choose wrong.

The summary includes all important information on the products you have selected. When you are happy with your choices, fill in your own information and send us the request for a quotation!

## Product cards

You can also choose the hot tub that suits you best on Kirami's website.

Browse the product pages of different hot tub models, find the one you like best and try out different kinds of tub colours and outer surface materials to see what they would look like on your hot tub. The product page of each hot tub always has only the options available for the hot tub in question, which means that you cannot accidentally

pick a heater or an accessor that is incompatible with the model you are considering. The system also ensures that all the necessary elements of a well-working tub are selected.

Once you are happy with the hot tub model and accessories you have chosen, you can download a product card of your future hot tub as a PDF file. Then you can print out the card, go to your nearest reseller and order the hot tub of your dreams.

### Kirami Original Breezy M

#### Cult-si ST-Coal Black, Light Gray

The Original product range's Breezy truly is an easy-care product with inside plastic. The enduring model is suitable for all purposes, making it a good choice for any situation. Its size makes Breezy M suitable for the average family, or why not a get-together with a small group of friends! As additional equipment LED lighting is an option that highlights the plastic's colour. Factory fitted LED lighting creates a fabulous atmosphere in the evening hours.

The hot tub is heated with an external grey Cult-si heater, suitable for heating small tubs. It is made out of high-quality marine-grade aluminium. The cover shell is made out of Finnish spruce panels stained with a dark coal tint, and it keeps its attractive appearance for a long time. Light gray is velvety smooth and delicate dotted isle colour. The soft, vibrant gray of the reactor is always timeless and elegant, and it blends in beautifully with the environment.

The barrel diameter is 170 cm and water volume is 240 litres. It is suitable for 4-6 people. The dry weight of the hot tub is 132 kg. The gross heat output of the Cult-si stove is 26 kW and the net heat output transferred to the water is 22 kW.

### Kirami Mass filters

Mass filter for filtering water is a laborious, important part of bathing in saunas. The high quality filter is suitable for small pools and hot tubs and filters every fluff, leaves, other dirt and impurities that come from bathing. MF250 is a small and heavy mass filter that is well suited for Kirami hot tubs. It filters the water first passing through a fine screen out. You can also use it as a pre-filter for the pump and other accessories of the hot tub. Notice between pump and hot tub! The hot tub model is also shown with other hot tubs and other accessories of the hot tub.

## FAQ, blog posts and videos

Those who have purchased a Kirami hot tub are never left alone with any questions they may have. There are answers, instructions and tips available for practically any situation.

The link to the FAQ (or Frequently Asked Questions) section can be found on nearly every page on Kirami's website. Whether your question was about transporting and installing a hot tub, heating, keeping the water clean or winter storage, the FAQ pages have a thorough discussion of the topic, often with an instructive video.

Kirami's blog posts vary from customer stories to presenting new products as well as in-depth discussions of topics that interest hot tub users. The blog posts contain a vast number of excellent tips and ideas that help you make your bathing moments more enjoyable than ever.

In the manuals section of our website, we have collected both practical how-to videos as well as atmospheric feeling videos. The clear and instructive how-to videos tell you how to install and use a hot tub. We have thought about everything in order to make your life with a Kirami hot tub as enjoyable as possible!

Original

*Quickly heated Chill for  
perfect relaxation.*

# Chill

**M**  
 3-4

**CHILL** is a new way to enjoy a hot tub. The low design of the bench enables a whole new way of relaxing in the tub, and the resting sitting position is perfect for a lazy soak. Chill is also great for children to splash around in. For the new model, we have made the tub even lower and its edge sturdier and more streamlined. In fact, the **CHILL** hot tub is the perfect choice for a small garden, because you can carry it through even narrow gates or doorways to the backyard easily. The small water volume guarantees that the hot tub can be filled quickly and keeps the consumption of firewood low.

**External colours:**

**Coal Black**

**Internal colours:**

**Stone Grey**

**Q: What kind of a base/foundation is needed for the hot tub?**

**A:** A level base that supports the full weight on the whole area of the hot tub must be selected as the base/foundation for installing the hot tub. The surface can be evened out with stone chippings, for example. If you want to have a more solid foundation, you can cast one from concrete or use ready-made slabs. Keeping the area surrounding the tub free from vegetation is also recommended. See the instructions!

## *Breezy - always a good choice*

**Q:** Can you use the hot tub in the winter?

**A:** You can use your hot tub normally in winter, provided that you take proper care of heating the water and remember to drain the tub after use. Please keep in mind that water splashes around the hot tub create a slipping hazard.

# Breezy

**M**

4-6

The Original product range, Breezy is a hot tub with a plastic inner tub in a solid colour. Both of the inner colour options come with safe LED lighting (Legroom led coronas) as an accessory; its glow brings out the tub's own colour. This enduring tub model is suitable for all purposes, making it a good choice for any situation. A new surface material option is coated metal, also familiar from roofing; thanks to the material, the outer surface of the tub requires no maintenance. Its size makes Breezy M suitable for the average family, or why not a gettogether with a small group of friends!

*The elegant Hazy is perfect  
for every location*

**NEW**

# Hazy

**M**  
 4-6

The easy-care hot tub offers comfort and modern style. Hazy is related to the popular Steady. We picked the features for Hazy that make it a perfect choice for people who are thinking about their first hot tub, for example. If you want a simple, straightforward hot tub that nevertheless offers comfort and ease of use, Hazy is just the thing for you. The raised seat design makes getting into the tub easier, the bench corners can be used as back rests, and the bench also acts as an arm rest. The smooth plastic surfaces of the tub in light colours make it possible to install safe LED lights available as accessories. The heater is an external CULT-si in shades of grey. The outer shell is made of durable Finnish spruce panels stained with a dark brown or black tint. The translucent grey interior is suitable for many different environments.

*Small size,  
great enjoyment  
- Tiny and Woody Tiny*

**NEW**

# Tiny

Part of our Original range, Tiny is a compact easy-care hot tub with a single-colour plastic interior. This petite hot tub features two shaped seats, making it ideal for one or two persons. Light in weight and compact in size, the hot tub is easy to install in both small yards and on terraces. Thanks to its small water volume, Tiny is quick to heat up, allowing you to enjoy a spot of luxury even on busy weekday evenings. The interior colour option is available with safe LED lighting as an accessory, which is installed at the factory. The glow of the LED lighting creates a magical atmosphere to bathing in the darkening night.

# Woody Tiny

S  
1-2

The Original Woody Tiny hot tub offers the authentic atmosphere of wood in a compact size. Woody Tiny is our smallest solid wood hot tub, ideal for both small yards and terraces. The compact size of Woody Tiny makes it perfect for couples and conditions where water consumption must be kept to a minimum. Thanks to its small water volume, the hot tub is also quick to heat up, allowing you to take a relaxing dip even on the busiest of evenings. The Woody Tiny hot tub offers everything you need for a great, wood-heated hot tub experience.

Comfort

*Family L - bathing experiences  
for families of all sizes*

# Family L

The Comfort series now includes the new Family L hot tub, which has enough space for even a group of bathers with the widest shoulders. The features of the tub are just as userfriendly as those of the M-size Family. The tub has a velvety smooth dotted blue, beige or grey interior surface, and there are various colour and material options for the exterior surface. The TUBE and CUBE heaters ensure fast and efficient heating.

Comfort

*Steady - modern comfort*

**Q: How can I move the hot tub?**

**A:** Hot tubs are primarily delivered with all accessories packed inside the tub, which means that the weight of the package can exceed 200 kg. The tub itself is relatively light. When you remove the heater and other loose parts from inside the package, the remaining weight ranges from 100 to 160 kg depending on the model, meaning that the tub can be carried by 3-4 people.

**We cooperate with VaLePa, the 2019 Finnish volleyball champions.**

# Steady

**M**  
4-6

The hot tubs in the Comfort series offer comfort and modern style for people who appreciate easy-care products. The new Steady hot tub in the Comfort series is designed to ensure that stepping into and out of the tub is easy. In addition to the traditional wood as surface material, Steady can be panelled with the renewed EcoPlank outer shell that requires no maintenance. The smooth plastic surfaces of the tub in light colours make it possible to install Kirami's safe LED lights to all Steady tubs.

8-12

The Grandy minipool is a hot tub big enough to fit a larger party of bathers at the same time. The tub also acts as a children's swimming pool. Grandy is considerably larger than traditional hot tubs, a bit deeper, and cubical in shape, and it has built-in benches on one side. The tub is made out of ThermoWood (TW). The colour options include unpainted wood and brushed grey, in which the surface of the planed wood is first brushed with steel brushes and then painted. There are several options for heating the tub water: the TUBE heater or the TUBE combined with a Tubtainer 2 maintenance heater. The tub is emptied either via the filter hoses or the ball valve of the TUBE heater.

LED lights on the outer edge of the tub are available as an accessory.

# Colours & Materials

The benefits of plastic tubs include great hygiene and flexibility. Dirt and impurities come off easily from the smooth inner surface, which does not peel even after years of use. The inner surface requires no maintenance, which means that the tub stays neat and clean year after year. Kirami's plastic tubs have been made out of either LDPE (low-density polyethylene) or HDPE (high-density polyethylene). LDPE and HDPE plastics are used in the food industry, and they are recyclable and UV protected. Both plastics come in several different colours. The inner surface of a tub made out of HDPE plastic is velvety smooth.

## Inside colours and materials:

### Polar Blue

The fresh, translucent blue calms down and relaxes the mind after a busy day.

### Soft Beige

The translucent dotted beige is neutral, stylish and velvety smooth.

### Light Gray

The slightly translucent, velvety smooth dotted light grey is both trendy and timeless. Suitable for all environments.

### Ocean Blue

Velvety smooth, ocean blue dotted colour with a translucent surface.

### Casual Gray

The translucent grey is always stylish and aesthetic. Harmonious and suitable for many different kinds of environments

### Caramel Beige

The caramel-toned beige is a warm, translucent colour that highlights the peace of nature.

### Stone Gray

The soft, vivid grey blends in beautifully with the environment; it is always timelessly elegant.

### Champagne

A clear, magnificently glossy champagne colour for elegant and memorable bathing experiences.

The colours of the actual products may differ from the colours shown in the examples.

LED lights are available as an accessory for colours marked with this symbol.

**Brushed grey (BG)**

The elegant and vivid grey tone is created when the surface of the planed ThermoWood is first brushed with steel brushes and then painted.

In the Grandy XL, LED lights are placed around the outer edge of the ThermoWood (TW) tub.

# Heaters

All Kirami hot tub heaters are made in high-class AlMg3 marine aluminium, which is an excellent heat conductor. Every heater is pressure-tested for leakages before it leaves our factory.

Overall dimensions of the stoves are maximum dimensions including also mounting brackets and other protruding parts of the stove.

\*The heating durations presented here are estimates based on practical tests. The actual duration depends on the circumstances, the firewood's quality, size and humidity, the intensity of the maintained fire and the rate with which new firewood is added.

# Heating a hot tub

The external heaters, manufactured by Kirami, are high-quality and easy to use. Use spills to light dry firewood that has been chopped into small pieces. Keep the temperature hot to produce less visible smoke. The heating is at its most efficient when the tub is covered and the fire in the heater is as hot as possible. Ensure that there are no flammable materials in front of or under the fire chamber. The heater will not heat up above the water temperature as the stove is surrounded by a water jacket. Make sure that there is enough water in the tub.

## Hearth plate

The fireproof hearth plate designed for Kirami's heaters protects the area in front of the heater from sparks, improving the fire safety.

## Anode- Rod

Kirami's magnesium anode rod protects your heater from corrosion. The rod is screwed to the place reserved for it in the heater, and it is replaced approximately once per year.

## Chimney parts

Extension pieces and spare parts are also available for Kirami's heater chimneys  
120 mm set 5 kg  
150 mm set 7 kg

NEW

## Heater glass doors

Available as an accessory, a glass heater door not only adds to the atmosphere of your hot tub by allowing you to enjoy the cozy glow of the fire, but also makes it easier to monitor wood consumption. The glass door is compatible with most Kirami hot tub heaters: **MICU**, **MACU**, **CULT** and new **CUBE** heaters (those manufactured after 2017).

# Tubtainer 2 - electric heater and filter

**Tubtainer 2** is an easy-to-use electric hot tub heater and filter unit. The system consists of an electric heater, a circulation pump, a filter and an operating panel. The maintenance heat only consumes a few dozen cents' worth of electricity per day, depending on the temperature outdoors. The water in the hot tub can remain ready for swimming up to several weeks with the integrated, automatic filter, when the necessary cleaning agents are also used in the tub. The Tubtainer 2 -heater can be used in addition to a traditional woodheated heater, or the tub can be heated by using only electricity. An electric heater is a good option when heating with wood is not possible.

*Tubtainer 2 -heater can be used in addition to a traditional woodheated heater, or the tub can be heated by using only electricity.*

# Steps and drink holders

MADE IN +  
FINLAND

Thanks to their high-quality materials, the steps and drink holders we design and manufacture will last for years even in the harshest weather conditions. The sturdy steps guarantee that you can step safely into and out of the hot tub, and the drink holders increase the comfort and enjoyment of bathing. Some models also come in different colours and made out of different materials. You can find more detailed information at our website: [www.kirami.fi/en](http://www.kirami.fi/en)

# Covers and locks

MADE IN  
FINLAND

We have covers for all of our hot tubs. Most hot tubs have both a plastic cover and an insulated cover available. Durable and high-quality insulated covers for hot tubs with dedicated versions for both external and internal heaters. A cover is especially useful accessory: with it you can speed up heating of your hot tub, keep the water hot for a longer time and optimize heating performance on the following day. The cover also protects your hot tub from debris and with a cover your hot tub remains clean when empty, and as well it protects inner parts of hot tub from UV-radiation. The cover improves safety especially for families with children and pets.

## ABS plastic round cover

Suitable for tubs with a diameter of 170cm with an outside heater. The plastic cover becomes a safety cover when you add a safety lock to it, available as an accessory. A lockable hot tub cover is an important safety feature that prevents small children from getting into the tub unsupervised, for example.

## Cover safety locks

A sturdy safety lock with a key is available for the plastic hot tub covers as an accessory.

## Insulated covers

Durable and high-quality insulated covers for hot tubs with dedicated versions for external heaters. The cover can also be folded in half and features built-in handles on sides, making it easy to lift and handle. Locking mechanism includes four buckled straps with safety locks which are included with the cover. The cover has been standardized (EN 17125) as a safety cover.

# Kirami Tubbar 2

Kirami's floating TUBBAR 2 drink holder is not only convenient and weather-resistant, but pleasing to the eye. Kirami's floating drink holders are high-quality and user-friendly. They insulate the heat coming off the bath water and keep your drinks fresh and cold. The products also provide a fun element as they float between the bathers, and no one has to retrieve refreshments as they are always within everyone's reach. These drink holders also feature marked places for drinks to help bathers find their own glasses despite the holder moving around. The drink holder is designed and manufactured in Finland.

# Other accessories

Kirami has plenty of different kinds of accessories and equipment that help you make your spa moments even more fun and enjoyable. Among other things, our range of products includes several new drink holders of different materials as well as bathing hats that help you relax further. Bathing hats keep you warm when it is cold, and they protect you from mosquito bites during the summer.

You can find more accessories at: [www.kirami.fi/en](http://www.kirami.fi/en)

Thermometers

Beanie

Tub hats

# Carefully thought out accessories

## LED lights

The LED lights that have been installed to the tub already at the factory create a magical atmosphere to bathing in the darkening night.

## Extension pipe kit

The kit contains all the parts you need to install an outlet valve between the heater and the tub. The product does not include a Kirami outlet valve; it replaces the existing outlet.

## Outlet hoses

Outlet hoses/feed-through kits for attaching external filters or heaters to Kirami hot tubs. You can purchase additional hoses and other equipment and supplies, such as chemicals, from us as needed.

The feed-through kit is used to attach a filter to Kirami hot tubs in addition to a heater (38 mm).

## EPS insulation

The EPS insulation under the bench and the bottom reflects the heat back from the water and increases seating comfort.

## Side insulation

Hot tubs with plastic interiors can be equipped with additional insulation between the outer panels and plastic interior. The additional insulation consists of a 5 mm layer of insulating foam that is installed at our factory if the additional insulation is ordered with the hot tub.

### Middle outlet kit

A middle outlet kit for Kirami's external heaters that makes it possible to connect the heater at a distance from the hot tub.

### Adjustment grids

Heater door adjustment grid for adjusting the air flow. The grid is standard equipment for the CUBE and TUBE heaters, and it can be purchased separately for the MICU, CULT and MACU heaters.

### Chimney parts

Extension pieces and spare parts are also available for Kirami's heater chimneys.  
120 mm set 5 kg  
150 mm set 7 kg

### Anode-Rod

Kirami's magnesium anode rod protects your heater from corrosion. The rod is screwed to the place reserved for it in the heater, and it is replaced approximately once per year.

### Hearth plate

The fireproof hearth plate designed for Kirami's heaters protects the area in front of the heater from sparks, improving the fire safety.

### Heater glass doors

Available as an accessory, a glass heater door not only adds to the atmosphere of your hot tub by allowing you to enjoy the cozy glow of the fire, but also makes it easier to monitor wood consumption. The glass door is compatible with most Kirami hot tub heaters: **MICU**, **MACU**, **CULT** and new **CUBE** heaters (those manufactured after 2017).

# Easy water hygiene with Kirami

## How to keep your bathwater clean

You do not need to change the bathwater in the hot tub after every use, but if you reuse the same water, special attention must be paid to water hygiene.

### Keeping water clean consists of two aspects:

- Maintaining the physical cleanliness of water with a filter.
- Eliminating bacteria and microbes with water treatment agents.

## Filtering

The filter is intended to clean the water from dust, leaves, the dirt caused by bathing, and other impurities. This is done by circulating the water in the tub through a filter. There are different types of filters, such as light filters suitable for smaller pools that use a filter cartridge, as well as more efficient filters that use either filter sand or filter fibre.

## Chemical cleaning

The hot tub water can be cleaned chemically either with chlorine or active oxygen. The correct water pH value is maintained with pH- and pH+ granules. In addition, there are chemicals available for preventing algae growth and clarifying water.

## Other cleaning

It is important to keep the hot tub clean even when it is not in use. Warm water and sunshine easily cause algae growth in the bottom and walls of the tub. The algacide prevents algae bloom, and its use is recommended especially on hot summer days. Small dirt particles may bypass the filter system, making the water in the tub look discoloured or cloudy. The small impurities in the water can be precipitated with a clarifying agent, which makes it easier to filter them out of the tub.

WATER HYGIENE

**TUBTAINER 2  
HEATER-FILTER UNIT.**  
*Easy to use electrical hot tub upkeep heater and filter unit. Hot tub's water will be usable for weeks with Tubtainer 2 and appropriate disinfection products.*

Warmer feelings.

BioCool

**BioCool offers simple, gentle and effective products for keeping the water clean that are safe for both people and the environment. BioCool participates in the fight to reduce the use of chlorine and antibiotics.**

### **BioCool Disinfect my pool**

**Easy-to-use and effective liquid pool water disinfectant.**

- Odourless and biodegradable.
- Completely chlorine-free, meaning that it does not include chlorine compounds that are harmful to health.
- Works with different pH values without losing effectiveness.
- Easy to dose directly from the bottle with the dosing module.
- Replaces chlorine, shock chlorination and algaecides and eliminates the need for pH measurement and adjustment.

### **BioCool Clear my pool water**

**BioCool Clear my pool water flocculating agent.**

- Helps remove small particles that make the water in the pool or tub cloudy.
- Causes particles that are too small for the filter to aggregate so that they can be captured by the filter.

### **BioCool Clean my pool filter**

**Swimming pool filter cleaning agent.**

- BioCool Clean my pool filter cleans the filter cartridge by dissolving dirt, without the need for scrubbing.
- Removes dirt and harmful microorganisms, such as bacteria, parasites and fungi.
- Cleaning the filter cartridge regularly guarantees the hot tub water quality.

**Use biocides safely. Always read the labels and product information before use.**

**None of the BioCool water treatment products contain chlorine compounds that release active chlorine, which means that they do not produce chloramines that are harmful to health.**

# For longer water life, invest in a filter

When ensuring the water in the hot tub is clean there are two cornerstones: the water treatment chemicals, and a proper filter. The filter will remove all the physical impurities from the water. By using these two forms of cleaning together, you don't have to change the water so often. After the use, it is essential to make sure that also the tub itself is clean. For that purpose, Kirami has its own high-quality detergents.

## FILTERS

### Mass filter MF250

MF250 is a small and efficient mass filter. As a filtering medium, you can use either traditional filtering sand or Kirami filter fibers, both of which can be washed and rinsed. You can also easily replace the medium when necessary.

### CF23 Cartridge filter

An effective external cartridge filter that works well with Kirami hot tubs. The cartridge can be washed and rinsed with running water or replaced, if necessary.

### Tubtainer 2 heater and filter combo

Easy-to-use, electric heater and filter combo for hot tubs. The water in the tub stays usable for a long period of time with the integrated filter when you use the needed chemicals in the tub.

### Cartridge filter SI 2000

A small, floating filter to be placed on the side of a Kirami hot tub. Excellent choice if you are looking for an inexpensive and easy-to-use filter.

## DETERGENTS

### Biowash, concentrate 5 litres

Biodegradable washing agent for cleaning and degreasing outdoor hot tubs and saunas.

### Biowash, spray 0,5 litres

Pre-diluted, biodegradable washing agent for cleaning and degreasing outdoor hot tubs and saunas.

### Sootwash, spray 0,5 litres

For removing soot and stubborn dirt from outdoor hot tub stoves, fireplaces and fireboxes.

# Tub care

**Q: What is the service life of the hot tub?**

**A:** The service life of plastic tubs is more than 15 years, but the wooden parts (panels) age/wear over time. The service life of wooden tubs is approximately 5-10 years, depending on how well it is maintained (washing, oiling and good ventilation).

**Q: Are plastic hot tubs easier to keep clean than wooden models?**

**A:** Plastic tubs are easier to clean, as dirt and impurities come off more easily from their smooth inner surfaces.

**Q: How should I maintain the inner surface of the hot tub?**

**A:** We recommend regularly washing the inner surface with detergent (such as Kirami Biowash), rinsing it with water and drying it thoroughly. The inner surface of a wooden tub requires more thorough cleaning than plastic tubs. However, take care not to scrub the inner surfaces too vigorously in order to avoid scratches.

**Q: Can I treat the inner surface of a wooden hot tub with oil?**

**A:** We do not recommend treating the inner surface of a wooden tub with oil or other similar substances, as they dissolve into the bathwater when the water is heated. The outer panels can be treated with various wood oils or stains, both water- and solvent-dilutable. In other words, you can use almost any wood treating products sold at hardware stores.

**Q: How should I maintain the outer surface of the hot tub?**

**A:** Stained, ThermoWood and spruce surfaces can be treated with wood oil, provided that they do not form a layer that could damage the panels as the wood swells and shrinks. For ThermoWood and stained spruce panels, you can use wood oil that can be diluted with water in a suitable shade of brown. Composite panels only need to be washed every once in a while. Red cedar panels can be treated with paraffin oil. When treating the tub panels, you can remove the outer hoops or cover them with adhesive tape during treatment, immediately removing any splashes or runoffs.

**Q: Why is plastic a good material choice for the hot tub?**

**A:** Plastic is a homogeneous and wear-resistant material. Plastic has a dirt-repellent surface, enabling quick and easy cleaning. You can also clean it with a pressure washer. Plastic requires no maintenance, withstands time, is UV-protected and can be used in any weather. It is environmentally friendly and recyclable.

**Q: How often should I change the bathwater?**

**A:** We recommend changing the bathwater after one or two days in normal family use. With correct filter and chemical use, the water can stay usable for bathing for 1-3 months. You should always use a sanitising chemical if you bathe in the water more than once.

# Outstanding

by KIRAMI

When guys get together. When form meets plain steel.  
When the passionate barbecuer gets together with  
the live flames. When the splashes of the soul meet  
the warmth of the tub. "Look, your evening is ready."

MADE IN  
FINLAND

## IRON MONSTER

The Iron Monster is a frying plate made out of sturdy rolled steel, and it can either stand on its own feet or be placed on the Roasty Boss BBQ grill. On it, you can fry juicy steaks for the whole party at the same time! This extremely versatile cooking implement acts like an old-style cooking range.

The grill in the middle of the Iron Monster can be detached easily, which allows you to poke the fire conveniently through the hole. In addition to cooking, the Iron Monster can be used as a fireplace to create the perfect mood.

Iron Monster

## ROASTY BOSS

Roasty Boss is a heavy-duty BBQ grill, guaranteed to fill the needs of even the most demanding of cooks. A wide range of accessories from cooking and frying plates to grates. Roasty Boss is the summer cook's right hand, cooking steaks simultaneously for even a larger company while a pot of potatoes boils on the side. The frame is made of weathering Corten steel, and the rest is stainless steel. The Roasty Boss is the dream for BBQ chefs who are passionate about cooking. The equipment is sturdy and durable in use, and there is plenty of space to make several dishes at the same time.

Roasty Boss pot

Roasty Boss

# TRIHOLDY

Triholdy is a new, highly adaptable, outdoor decor sensation. The triangular elements can be combined to build an individual storage unit, partitions and firewood holders for the patio. Build a privacy screen or windbreak for the hot tub to match the style of your garden. The Triholdy can be transformed into a green wall using different arrangements of potted plants. Or the triangles can be laid flat and used as a planter.

# LEATHER PATRON

This is no beer barrel cover – this is a truly stylish and manly apron, made out of thick antiqued leather of high quality, of course. A leather apron distinguishes the uncrowned king of the grill, and it makes an excellent gift.

# KINDLING CRACKER

A safe and easy-to-use way to split firewood into kindling. Kindling Cracker is durable, because it is made out of one single piece of cast iron, and brushing is normally the only maintenance it needs.

### TIP:

Get the best results in all grilling with Outstanding charcoal or birch firewood!

## *You have earned your luxury!*

---

You can always recognise Kirami's products from their careful finishing touches. Kirami manufactures the hot tubs from high-quality and durable materials, offering various options to meet the customers' different tastes. The quality also includes the easy maintenance and the practicality of the hot tubs.

Starting the use of a product is simple and easy. Service is taken care of so that the customer can have memorable, high-quality experiences in the Kirami tubs, regardless of season.

Customer satisfaction is our greatest resource!

# Kirami is also a safety pioneer

Kirami was the only Finnish hot tub manufacturer to be actively involved in creating the new EU standard EN 17125 for the safety requirements and test methods related to domestic hot tubs. The safety of small children is especially important to Kirami, and the topic has also played a central role in the work done on the standard.

Companies in the field as well as safety authorities, such as the Finnish Safety and Chemicals Agency (Tukes) and other European agencies, have been involved in the development. The standard takes safety perspectives, technical details, quality and different kinds of instructions into account. When customers buy a hot tub compliant with this standard, they can be sure that the product is safe.

## This is how we meet the requirements of the standard

### Cover

The standard pays special attention to the safety of children. A hot tub cover is the most effective way to ensure that children cannot enter the tub without supervision. Adults are always responsible for the safety of children in the end, and they must monitor the children in the vicinity of the tub and ensure that the cover is locked while the tub is unsupervised.

All of Kirami's hot tub models have a suitable high-quality cover available that is easy to handle and can be equipped with a safety lock. In addition to safety, the cover has other benefits.

- Prevents children from entering the tub without supervision.
- Protects the tub from debris and UV radiation.
- Heats the water faster.
- Keeps the water warm for longer.
- Reduces the need to heat the water on the following day.

### Steps

The standard requires that the user has a safe route into and out of the hot tub.

Usually this requires steps on the outside; the end customers can naturally choose whether to add steps or not. Kirami offers a variety of steps for all available hot tubs.

- You can climb safely into and out of the tub.

### Grates

One of the standard's most important safety requirements is that there must not be any holes inside the tub in which hands, fingers, feet, toes or a head could get stuck under water. In Kirami's tubs, such holes are covered with protective grates.

- Increase safety by preventing fingers and toes from getting stuck.
- Reduce the amount of rubbish that ends up in the water circulation.

### Thermometer and mixing paddle

The standard requires monitoring the hot tub water temperature in order to ensure that the temperature is safe for bathing. This can be done with different types of thermometers.

Before measuring the temperature, the hot surface water needs to be mixed with the cooler water below to ensure that the measurement results are accurate. This can be done easily with Kirami's mixing paddle, for example. You should still check the water temperature with your own elbow before stepping into the hot tub!

- Mix the water to ensure an even temperature
- The thermometer shows you when the water temperature is suitable.

### Heat shield, chimney cap and fireproof plate

The standard also aims to ensure the fire safety of hot tubs and heaters.

The heat shield, chimney cap and fireproof plate promote fire safety. Naturally, Kirami provides all necessary instructions on the minimum distances related to fire safety in accordance with the standard. When heating is done according to the instructions, i.e. the tub is filled with water before starting the heating, the outer surface of Kirami's heaters will not get hot enough to burn. Thanks to the free water circulation, the aluminium heater is cooled by water.

- The heat shield protects you from the hot chimney pipe.
- The chimney cap reduces the number of sparks spreading into the surrounding nature.
- The fireproof plate prevents embers from falling into easily flammable ground.

Minimum distances between hot tubs heated with wood and flammable objects

### Water hygiene

The standard requires that appropriate instructions for keeping the water clean must be available and the user must be able to follow them easily. In addition to instructions, Kirami offers a whole range of water treatment products. Ask your retailer for more information.

### Durable, traceable and recyclable materials

The standard also makes statements on the manufacturing materials and the overall product quality.

The Kirami hot tubs and the Outstanding products are made to last, and all hot tubs have a two-year warranty. All materials in a tub can be recycled. The tub heater and the hoops go to metal recycling. The wood, rubber and plastic parts can be recycled to be reused or used as energy-from-waste. Sorting the materials at the waste collection will be easier if you have disassembled the tub yourself. When you separate the materials carefully, you will make waste collection easier and reduce the waste fee you need to pay.

- The warranty works reliably.
- You can still get spare parts and equipment for your hot tub years later.
- You can replace your Kirami hot tub without needing to worry about anything.

# Safe bathing

Below, you can see explanations of the symbols related to operating safety shown in connection with the hot tub.

Before starting heating, fill the hot tub with water up to the minimum level, i.e. approximately 5 cm above the upper pipe of the heater.

- Read the instruction manual and safety regulations before use.

- Keep an eye on the children while they are in the hot tub.

- Jumping into the hot tub is prohibited!

- Be careful of the hot surfaces!

Kirami's partners, the actor Ville Haapasalo and the inventor Janne Käpylehto

Good to know

# Ordering Kirami products

Ordering Kirami has more than 20 resellers all over Europe. You can find your nearest reseller on our website: [www.kirami.fi](http://www.kirami.fi).

The resellers will give you an offer for the products you choose. Time and way of delivery depend on the product you wish to have.

The delivery of the tub can be arranged for the requested address.

## Product registration

Remember to register the Kirami product you have purchased on our website. Registration offers you several great benefits. If you wish, you can get tips for using your products and offers related to them. In addition, we will also send a small gift to everyone who registers a Kirami product.

## User manuals

Each hot tub and heater includes a user manual. You can also download the latest user manuals from our website.
