

*Warmer feelings.*

*For the perfect  
bathing experiences*

## *New products, even more enjoyable baths*

Our product selection has been renewed and expanded significantly compared to last year. New, interesting models have been added to all hot tub product groups. For example, our favourite tub Family M is joined by the **Family L** that is big enough for large families, too, and the beauty and comfort of the new **Pearly** in the Premium series attract both looks and bathers.

The striking **LED lighting** is guaranteed to raise the mood, and it is now available for almost all tub models. Our selection of accessories has grown with products that improve comfort and enjoyment. One example is the **Tubtainer 2 combined filter and heater unit**, which keeps the water warm and clean even longer.

We have also conquered new ground by launching our own Kirami **FinVision sauna**, which brings you closer to nature while bathing. With our Outstanding products, you can make your yard the most enjoyable place in your home.

*Enjoy browsing our new product catalogue!*

Kirami is the largest hot tub supplier in Europe. It offers its customers high-quality hot tubs heated by wood, electricity and diesel, and a wide array of different kinds of supplies and accessories. The popularity of Kirami's products increases constantly, and already more than 5000 tubs made by Kirami are sold annually all around Europe.

Kirami's business concept is to offer high-quality products that are easy to use and that you are happy to show off and recommend to your friends and acquaintances, too. All of our tubs and pools are manufactured by hand from carefully selected materials, and they are assembled at our factory in Sastamala, Western Finland.

# Original

Kirami Original is a bathing experience at its most genuine. The quality of the simple, traditional hot tubs is born out of their carefully selected materials and finishing.

The Original product line has an option available for groups of bathers of every size. The new **Breezy** is an easy-care basic hot tub. As for the **Woody** tubs, they appeal to nature lovers who appreciate the atmosphere created by real wood.

Kirami Original is purely Finnish.

# Comfort

The Kirami Comfort hot tubs are easy-care plastic tubs suitable for active bathers.

**Steady**, the new addition to the Comfort series, is the perfect choice for people who value modern style and comfort.

The wildly popular Family M has been joined by a larger **L version** that is big enough for large families. The Family hot tubs are designed to take the needs of families with children, elderly people and disabled people into account by ensuring that getting into and out of the tub is as easy and safe as possible.

# Premium

The Premium series includes our finest products. Their design, usability and comfort of use are in a class of their own.

The latest additions to the Premium product family are the luxurious **Pearly**, which is also available with a truly stunning outer surface in copper, and the **Grandy XL**, which is the largest tub in our product range as its name suggests.

The Premium products maintain their appealing looks year after year, even in challenging conditions.

# Kirami's:

## Easy to buy:

- wide range of products
- appearance and placement can be tested with a 3D application
- professional reseller network
- can be placed almost anywhere
- delivered already assembled; the customer only needs to attach the heater and the chimney
- clear, comprehensive instructions
- can be delivered anywhere
- plenty of product information on the website (blogs, FAQ, product cards).

## Safe to use:

- all chimney packages include a heat shield
- thanks to the water jacket, the heater never becomes burning hot
- lockable covers
- protective grates for the discharge outlets on the bottom of the tubs
- LED lights installed safely at the factory
- sturdy and safe steps that fit all hot tubs
- models that take the needs of families with children, elderly people and disabled people into account in particular
- safety requirements in accordance with the standards have been taken into account.

## Effortless to equip:

- suitable covers, steps and drink holders available for all models
- plenty of accessories, such as neck rests and LED lights.

## Easy to care:

- easy to empty completely out of water
- simple to keep clean
- the heater is easy to clean
- an anode rod protects the heater from corrosion and ensures a long service life
- the EPS base is light and weatherproofed
- outer surface options that require no maintenance: EcoPlank, EcoStripe, Metal and Copper
- the cover protects the tub from rubbish and keeps the bathwater warm.

## A responsible choice:

- made in Finland
- standardised
- responsible manufacturer
- the whole lifespan has been considered: long-lasting and recyclable.

Original

*Breezy - always a good choice*

# Breezy

**M**  
4-6

Breezy, the latest addition to our Original product range, is a hot tub with a plastic inner tub in a solid colour. Both of the inner colour options come with safe LED lighting as an accessory; its glow brings out the tub's own colour. This enduring tub model is suitable for all purposes, making it a good choice for any situation. A new surface material option is coated metal, also familiar from roofing; thanks to the material, the outer surface of the tub requires no maintenance. Its size makes Breezy M suitable for the average family, or why not a get-together with a small group of friends!

**THE POPULAR FAVOURITE**

Family-step

# Family

**M**

4-6

The Family hot tub has been developed to take the needs of children, elderly people and disabled people into account. In addition to practicality, its development has focused increasingly on safety. The new step makes it easier to climb into and out of the tub. You can also sit on the step, which makes the height of the tub more comfortable and relaxed for children and shorter people.

**New product of 2019**

Family L 

**L**  
6-8

The Comfort series now includes the new Family L hot tub, which has enough space for even a group of bathers with the widest shoulders. The features of the tub are just as user-friendly as those of the M-size Family. The tub has a velvety smooth blue, beige or grey interior surface, and there are various colour and material options for the exterior surface. The TUBE and CUBE heaters ensure fast and efficient heating. Just like our other hot tubs, Family L can also be heated conveniently with an electric or diesel heater.

# Steady - modern comfort

Available in spring 2019

## Steady

M  
x 4-6

The new Steady hot tub in the Comfort series is designed to ensure that stepping into and out of the tub is easy. In addition to the traditional wood as surface material, Steady can be panelled with the renewed EcoPlank outer shell that requires no maintenance. The smooth plastic surfaces of the tub in light colours make it possible to install Kirami's safe LED lights to all Steady tubs.

# Pearly

M

4-6

The strengths of the Premium Pearly tub include the user-friendly design familiar from the Family series. Premium Pearly is the choice of bathers who value easy-care products of high quality. The tub's glossy, champagne-coloured inner tub made out of ABS plastic represents the highest class of hot tubs. The surface materials also include elegant copper (ME) that follows the shapes of the tub; in addition to being stylish, it also means that the outer surface of the tub requires no maintenance and ages gracefully.

# Grandy XL – for even greater bathing experiences

## Grandy XL

**XL**  
8-12

The Grandy minipool is a hot tub big enough to fit a larger party of bathers at the same time. The tub also acts as a children's swimming pool. Grandy is considerably larger than traditional hot tubs, a bit deeper, and cubical in shape, and it has built-in steps on one side. LED lights on the edge of the tub are available as an accessory.

# Colours & Materials

The Kirami hot tubs come in many different colour and material options. The benefits of plastic tubs include great hygiene and flexibility. Dirt and impurities come off easily from the smooth inner surface, which does not peel even after years of use, unlike in fiberglass tubs, for example. Plastic requires no maintenance, is UV-protected and can be used in any weather.

**EcoPlank (EP)**  
A durable panel made out of recycled plastic with a smooth surface that requires no maintenance.

**EcoStripes (ES)**  
A durable panel made out of recycled plastic with a grooved surface that requires no maintenance.

**Stained Spruce (ST)**  
Natural stained spruce panel. The beautiful brown tint will stay good-looking for a long time. We recommend re-staining every couple of years.

**Thermowood (TW)**  
Original and natural heat treated pine panels have beautiful warm brown shade.

**Red Cedar (RC)**  
Multi-hued, nearly branchless wood is very beautiful and becomes darker over time, into a more even grey hue. Top quality rot resistance.

**Metal, Copper (ME)**  
The material requires no effort or maintenance and develops an elegant green patina over time.

**Metal, Black (ME)**  
This surface material is here to stay. Because it is stainless and weather-proof, it requires no maintenance.

ES - Mocca

# Heaters

All Kirami hot tub heaters are made in our own aluminium welding factory. The material is high-class AlMg3 marine aluminium, which is an excellent heat conductor. Every heater is pressure-tested for leakages before it leaves our factory.

\*The heating durations presented here are estimates based on practical tests. The actual duration depends on the circumstances, the firewood's quality, size and humidity, the intensity of the maintained fire and the rate with which new firewood is added.

### Chimney parts

Extension pieces and spare parts are also available for Kirami's heater chimneys

### Anode- Rod

Kirami's magnesium anode rod protects your heater from corrosion. The rod is screwed to the place reserved for it in the heater, and it is replaced approximately once per year.

# Alternative heating methods

**Coming in spring 2019**

*The Tubtainer heater can be used in addition to a traditional wood-heated heater or the hot tub can be heated by using only electricity*

**Tubtainer2** is an easy-to-use electric hot tub heater and filter unit. The system consists of an electric heater, a circulation pump, a filter and an operating panel placed in a painted metal box. The maintenance heat only consumes a few dozen cents' worth of electricity per day, depending on the temperature outdoors. The **Tubtainer2** heater can be used in addition to a traditional wood-heated heater, or the tub can be heated by using only electricity. An electric heater is a good option when heating with wood is not possible. The water in the hot tub can remain ready for swimming up to several weeks with the integrated, automatic filter, when the necessary cleaning agents are also used in the tub.

	TUBTAINER 2
<b>HEATING CAPACITY</b>	2 kW
<b>ENERGY SOURCE</b>	Electricity
<b>DIMENSIONS (W X D X H)</b>	410 x 605 x 645 mm
<b>WEIGHT</b>	33 kg
<b>PURPOSE OF USE</b>	Filtering bathwater, heating the water and maintaining the water temperature

**Rexener PR-200** is very efficient, easy-to-use and economical heater for heating the water in a hot tub or swimming pool. The recommended fuel for the Rexener PR-200 water heater is biodiesel, but it also runs smoothly with diesel or fuel oil. NOTE! In order to work, the heater requires a circulation pump that is sold separately.

	REXENER PR-200
<b>HEATING CAPACITY</b>	20 kW
<b>BRÄNSLEFÖRBRUKNING</b>	2,0 L/h
<b>ENERGY SOURCE</b>	Biodiesel, diesel or fuel oil
<b>DIMENSIONS (W X D X H)</b>	320 x 580 x 839 mm
<b>VIKT</b>	38 kg
<b>ANVÄNDNINGSAÄNDAMÅL</b>	Heating and maintaining heat

*Dreams come true,  
your own hot tub*

The Kirami hot tubs are easy to maintain, and installing them is very simple. Thanks to the EPS base, you can place the tub on almost every flat surface. The base of the tub can be stabilised with stone chips.

All hot tub models are delivered assembled: you only need to connect the heater to the tub with two rubber hoses. Once the chimney is in place and water is in the tub, the tub is ready for use.

*Heating a  
hot tub*

The external heaters, manufactured by Kirami, are high-quality and easy to use. Fill the furnace with dry firewood that has been chopped into small pieces, after which you can ignite by using fire starter pieces. The hotter the fire-burning temperature is, the less visible smoke the wood will emit.

The heating is at its most efficient when you use a cover on the tub during the heating and maintain a large fire in the heater.

Using the heater is fireproof as long as you ensure that there are no flammable materials in front of or under the fire box. The stove will not heat up above the water temperature as the stove is surrounded by a water jacket.

*Enjoy clean  
bath water*

Kirami hot tubs make cleaning exceptionally easy. It is recommended that you wash the tub from the inside after bathing, using biodegradable detergents, such as Biowash. Spray the cleaning agent on the tub's inside walls and rinse it off.

If you want to use the same water for a longer time, you need to use both chemicals and a filter. The water stays clean and hygienic for a long time only by using these measures together.

Ask your local retailer for more information. The availability of chemicals and filters varies depending on your location.

*Warmer feelings.*

Hot tub equipment &  
Accessories

# Covers

In Kirami's high-quality range of covers, you can find durable ABS covers suitable for all purposes as well as insulated covers suited especially well for cold conditions. All covers are made in Finland.

**ABS plastic round cover**  
Suitable for tubs with a diameter of 170cm with an outside heater.

**Insulated cover**  
The insulation covers can be folded, and they have a faux leather lining and aluminium reinforcements.

# Steps

All our step models are designed and manufactured by us. The strong structure guarantees safe passage to the hot tub and quality material will last for a long time, even in harsh weather conditions. Some models also come in different colours and made out of different materials. You can find more detailed information at our website: [www.kirami.fi](http://www.kirami.fi)

# Carefully thought out details

## LED lights

The LED lights that have been installed to the tub already at the factory create a magical atmosphere to bathing in the darkening night.

## Lockable cover

A lockable hot tub cover is an important safety feature that prevents small children from getting into the tub unsupervised, for example.

## Hearth plate

The fireproof hearth plate designed for Kirami's heaters protects the area in front of the heater from sparks, improving the fire safety.

## EPS insulation

The EPS insulation under the bench and the bottom reflects the heat back from the water and increases seating comfort.

## 3D hot tub selector

Build the hot tub you want in the application and see how it fits in your own yard.

# How to keep your bathwater clean

You do not need to change the bathwater in the hot tub after every use, but if you reuse the same water, special attention must be paid to water hygiene.

## Keeping water clean consists of two aspects:

- Maintaining the physical cleanliness of water with a filter.
- Eliminating bacteria and microbes with water treatment agents.

## Filtering

The filter is intended to clean the water from dust, leaves, the dirt caused by bathing, and other impurities. This is done by circulating the water in the tub through a filter. There are different types of filters, such as light filters suitable for smaller pools that use a filter cartridge, as well as more efficient filters that use either filter sand or filter fibre.

## Chemical cleaning

The hot tub water can be cleaned chemically either with chlorine or active oxygen. The correct water pH value is maintained with pH- and pH+ granules. In addition, there are chemicals available for preventing algae growth and clarifying water.

## Other cleaning

It is important to keep the hot tub clean even when it is not in use. Warm water and sunshine easily cause algae growth in the bottom and walls of the tub. The algaecide prevents algae bloom, and its use is recommended especially on hot summer days.

Small dirt particles may bypass the filter system, making the water in the tub look discoloured or cloudy. The small impurities in the water can be precipitated with a clarifying agent, which makes it easier to filter them out of the tub.

## Washing Agents

It's important to keep hot tub clean also when it's not used. With Kirami's washing agents it's quickly and easily done.

### Biowash, concentrate 5 litres

Biodegradable washing agent for cleaning and degreasing outdoor hot tubs and saunas.

### Biowash, spray 0,5 litres

Pre-diluted, biodegradable washing agent for cleaning and degreasing outdoor hot tubs and saunas.

### Sootwash, spray 0,5 litres

For removing soot and stubborn dirt from outdoor hot tub stoves, fireplaces and fireboxes

Relaxing in a high-quality hot tub is a pleasure in itself, but Kirami's high-quality accessories help you make the experience even more heavenly. Our range of products has equipment that improves the usability and comfort and makes the spa centre in your yard more stunning than ever.

*Make your spa moment  
even more enjoyable*

Hot tub equipment

## Drink holders and other accessories

Kirami has plenty of different kinds of accessories and equipment that help you make your spa moments even more fun and enjoyable. Among other things, our range of products includes several new drink holders of different materials as well as bathing hats that help you relax further. Bathing hats keep you warm when it is cold, and during the summer they keep insects away from your head.

You can find more accessories at: [www.kirami.fi](http://www.kirami.fi)

## NEW! WaterBass!

A floating, rechargeable Bluetooth speaker with LED lighting that changes colour. If you wish, you can link two WaterBasses in a chain to enjoy a sound that is twice as massive. WaterBass is guaranteed to raise the mood for bathing!

# Outstanding

by KIRAMI

When guys get together. When form meets plain steel. When the passionate barbecuer gets together with the live flames. When the splashes of the soul meet the warmth of the tub. "Look, your evening is ready."

## IRON MONSTER

The Iron Monster is a frying plate made out of sturdy rolled steel, and it can either stand on its own feet or be placed on the Roasty Boss BBQ grill. On it, you can fry juicy steaks for the whole party at the same time! This extremely versatile cooking implement acts like an old-style cooking range.

The grill in the middle of the Iron Monster can be detached easily, which allows you to poke the fire conveniently through the hole. In addition to cooking, the Iron Monster can be used as a fireplace to create the perfect mood.

## ROASTY BOSS

Roasty Boss is a heavy-duty BBQ grill, guaranteed to fill the needs of even the most demanding of cooks. A wide range of accessories from cooking and frying plates to grates. Roasty Boss is the summer cook's right hand, cooking steaks simultaneously for even a larger company while a pot of potatoes boils on the side. The frame is made of weathering Corten steel, and the rest is stainless steel.

The Roasty Boss is the dream for BBQ chefs who are passionate about cooking. The equipment is sturdy and durable in use, and there is plenty of space to make several dishes at the same time.

## FREEDOM

Freedom is a modern outdoor fireplace, which offers the flicker of flames and pleasant warmth for anything from garden parties to hot tub parties. The crowning glory of the garden is easy to assemble and move around the decking or patio for the pleasure of people enjoying the hot tub.

The body of the fireplace Freedom is made of weathering corten steel, which gains a rustic rust surface over time. The grid is made of stainless steel.

**TIP:**  
Get the best results in all grilling with Outstanding charcoal or birch firewood!

## TRIHOLDY

Triholdy is a new, highly adaptable, outdoor decor sensation. The triangular elements can be combined to build an individual storage unit, partitions and firewood holders for the patio. Build a privacy screen or windbreak for the hot tub to match the style of your garden.

The Triholdy can be transformed into a green wall using different arrangements of potted plants. Or the triangles can be laid flat and used as a planter.

## LEATHER PATRON

This is no beer barrel cover – this is a truly stylish and manly apron, made out of thick antiqued leather of high quality, of course. A leather apron distinguishes the uncrowned king of the grill, and it makes an excellent gift.

## *You have earned your luxury!*

You can always recognise Kirami's products from their careful finishing touches. Kirami manufactures the hot tubs from high-quality and durable materials, offering various options to meet the customers' different tastes. The quality also includes the easy maintenance and the practicality of the hot tubs.

Starting the use of a product is simple and easy. Service is taken care of so that the customer can have memorable, high-quality experiences in the Kirami tubs, regardless of season.

Customer satisfaction is our greatest resource!

# The story of Kirami

Kirami's story starts in 2001, when the first hot tubs were imported from Sweden. Our own production started soon after. The first premises were located at an old equipment shed, and the company started out with a small selection of a few tubs and one heater.

In 2006, we moved into larger premises, and the following year the product range expanded to cover hot tubs made out of ThermoWood as well as the even more efficient external TUBE heaters. At the same time we also purchased

another facility for component manufacturing and company administration. Next, we developed an above-ground swimming pool made out of ThermoWood and a compatible heater, and in 2010 we launched the kylpytynnyri.fi brand that included several affordable hot tub models and the inexpensive external CULT heater.

In late 2010, Kirami made the largest investment in its history. In it, we acquired our current premises, which have more than 3,000 square metres for serving our customers.

In the following spring, we launched a hot tub model with a plastic inner tub and a comprehensive selection of chemicals for keeping hot tubs and swimming pools clean.

In 2015, we decided to develop Finnish products of high quality for outdoor decoration and cooking. We came up with the Outstanding product line that focuses on BBQ grills, outdoor fireplaces and outdoor decoration made out of fashionable, robust COR-TEN steel.

## Kirami follows the requirements of the new standard

We want to offer our customers bathing experiences that are as safe and enjoyable as possible, as well as carefree ownership throughout the lifespan of our products. By participating in the creation of the European standard, we have aimed to promote this responsible operating model in the whole field.

As the only Finnish hot tub manufacturer, Kirami has been actively involved in creating the standard for the safety requirements and test methods related to domestic swimming pools, whirlpool baths and hot tubs. When drawing up the standard (EN 17125), special attention has been paid to the safety of small children.

At Kirami, most of the safety issues presented in the standard have been in good order for a long time already, but we will not rest on our laurels - instead, we will continue to develop and manufacture even safer and more user-friendly products in the future, too.

For example, one of the standard's most

important safety requirements is that there must not be any holes inside the tub, in which hands, fingers, feet, toes or a head could get stuck under water. In the future, all Kirami hot tubs will have protective grates in front of the water flow-through holes.

The heat shield for the chimney, measured 100 cm from the surface of the heater as required by the standard, has been standard equipment in our hot tubs from the start. The heat shield prevents the people near the heater from burning themselves on the hot chimney. The heater itself will not become burning hot thanks to its water jacket.

The standard requires offering safe steps for getting into and out of the tub. Of course, getting the steps is the customer's decision, but we offer different step models for all of our hot tubs being sold.

An essential factor in the safety of children is that they must not get into the tub unmonitored.

This can be implemented in many ways, but a lockable cover is the easiest, fastest and most secure solution. All of Kirami's hot tub models have a suitable high-quality cover that is easy to handle. A lock has already been available for the plastic domed covers for years, but in the future, the fastening of the insulated cover will also become lockable. We nevertheless remind you that in the end, adults are responsible for the safety of children, and they must monitor the children in the vicinity of the tub and ensure that the cover is locked.

In addition to safety, the standard also makes statements on the manufacturing materials and the overall quality of the products. At Kirami, these issues have been at the centre of attention from the start. We have been constantly developing the materials we use, while also taking their recyclability into account.

## The leading manufacturer of hot tubs in Europe

The quality and good looks of Kirami's products are delivered by our skilled workforce, consisting of approximately 20 persons working at our Sastamala facility and 10 persons in our own aluminium shop. On top of that we also use a wide selection of local contractors. Our success is based on continuous customer-oriented product development, which focuses on making our

hot tubs as easy to set up and use as possible, providing customers with a comprehensive range of products and ensuring the availability of accessories and spare parts. We are also constantly searching for new long-lasting materials to use in our products. One of our most important criteria for choosing manufacturing materials is their recyclability.

As of 2018, Kirami Oy is the largest hot tub manufacturer in Europe. We supply over 5,000 hot tubs around Finland and Europe every year. Our turnover in 2018 was EUR 8.2 million, of which exports account for approximately 30%. Our reseller network has complete coverage in Finland, and we are constantly expanding our network of European resellers.

### Good to know

## Ordering Kirami products

### Ordering

Kirami has more than 20 resellers all over Europe. You can find your nearest reseller on our website: [www.kirami.fi](http://www.kirami.fi).

The resellers will give you an offer for the products you choose.

Time and way of delivery depend on the product you wish to have. The delivery of the tub can be arranged for the requested address.

### User manuals

Each hot tub and heater includes a user manual. You can also download the latest user manuals from our website.

### Product registration

Remember to register the Kirami product you have purchased on our website. Registration offers you several great benefits. If you wish, you can get tips for using your products and offers related to them. In addition, we will also send a small gift to everyone who registers a Kirami product.

### FAQ - Frequently asked questions

In addition to our comprehensive instructions, you can also find information and tips in the FAQ section on our website, where we have collected the most frequently asked questions from the users.
